DETAILED ACTION

Response to Amendment

1. Applicant's response filed July 19th 2007 has been entered and made of record.

2. Applicant has amended claims 1, 2 and 7. Claim 4 has been cancelled. New claims 11-13 have been added. Claims 1-3 and 5-13 are now pending.

3. Applicant's remarks in view of the newly presented amendments have been fully considered and are found to be persuasive. Claims 1-3 and 5-13 are accordingly found to be allowable. Reasons for allowance are presented below.

Allowable Subject Matter

4. Claims 1-3 and 5-13 are allowed.

The following is an examiner's statement of reasons for allowance:

Applicant's remarks make the record clear. The previously presented reference to Kurtze discloses most of the claimed limitations, but fails to disclose the newly added limitations of:

"wherein the picture element components A and the picture element components B comprise a luminance component Y and a color difference component selected from two color difference components according to sampling frequencies of the two color difference components."

Kutze does not explicitly disclose that the color difference component is selected from two color difference components according to sampling frequencies of the two color difference components. No other found prior art of reference teaches or fairly suggests this particular limitation. Therefore Independent claims 1 and 7 and all corresponding subsequent dependent claims are found to be allowable, including new claims 11-13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
